Sarah-

Turns out Mike is on annual leave today (had use or lose), so we can just play it by ear. If we don't have anything by noon, then we may consider cancelling.

Ruth

We still have the 1:00 meeting on our calendars as a placeholder ("Choreography..."). We can proceed with holding this time in case a PPT is received between now and then, or we can cancel the 1:00 meeting in advance (e.g., around noon). Which is your preference?

Sarah

Sarah-

Sorry I haven't had a chance to comment previously. This looks good to me.

Thanks for keeping the process moving!

Ruth

Sarah Furtak Felicia and Tod (cc Jim), Thanks for your comm... 08/01/2012 11:24:11 AM

 Subject: Final review: documentation to tribe

Felicia and Tod (cc Jim),

Thanks for your comments on the draft documentation to the Kalispel Tribe. I've incorporated your comments, as well as a couple from R10.

This morning I received the attached email from the attorney for the Kalispel Tribe.

I would like to send out the documentation of the Jul 24 meeting to the Tribe (cc the Region) today so as to document the visit in a timely manner.

Will my forwarding what follows (including Zach's email and attachments) to the Tribe (cc the Region, technical panel, and Zach) fulfill Zach's request to **"add the email and attachments to the administrative record, and forward the email on to the members of the review panel and Region 10 (please cc me.)"**?

I realize Felicia may be out of the office, so Jim and Tod, please let me know your response at first opportunity. Again, I'd like to provide this to the Tribe today. Thanks, -- Sarah 202 566 1167

Deane,

Thank you for having visited to present the Kalispel Tribe's perspective on the Pend Oreille Temp TMDL.

Below please find a summary of the Kalispel Tribe visit to EPA Headquarters on July 24. Also attached please find a follow-up transmittal from Kalispel Tribe attorney providing additional materials.

Subject: 7/24 Meeting Follow Up

Sarah:

The attached documents and hyperlink below contain information that is responsive to several of the questions raised by the panel at the Kalispel Tribe's meeting with EPA Headquarters on July 24, 2012. They establish several points:

- 1) Dr. Massmann's report shows that Ecology's cumulative frequency analysis ("CFA") does indeed mask violations of Washington water quality standards at the Idaho-Washington stateline. It also demonstrates that water flowing across stateline is warmer under existing conditions than it was under natural conditions on most days when there are violations of Kalispel water quality standards.
- 2) The highlighted text in the other attachments establishes:

- a. Ecology employed a 7-day rolling CFA in response to the regulated community's concerns about lag time, and concluded that the results were similar to a pairwise analysis.
 - b. Ecology employed a 30-day CFA and found that the level of impairment was almost the same as a 7-day CFA. Senior Ecology staff supported applying the 30-day CFA as a means of diffusing an argument from the regulated community about lag time, reasoning that the point is there is still an impairment. Ecology did not provide a scientific basis for using a 30-day CFA.
 - c. Ecology knew that a 60-day CFA would begin to mask impairment as early as April 2008.
- 3) The water quality standards at issue in the Willamette TMDL are based on a seven-day moving average of daily maximum temperature. See Willamette TMDL at 4-8, available at <http://www.deq.state.or.us/wq/tmdls/docs/willamettebasin/willamette/chpt4temp.pdf>. Application of CFA to a 7-DADMax metric does not support applying CFA to the Kalispel Tribe's or State of Washington's 1-DMax temperature standard.

I would very much appreciate it if you would confirm receipt of this email, add the email and attachments to the administrative record, and forward the email on to the members of the review panel and Region 10 (please cc me). Please let us know if the panel has any other questions.

Many thanks.

Zach
